DETAILED ACTION***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Compounds of the following structure:

Where each of X₁ to X₉ are either:

Group 1: Carbon

Group 2: Nitrogen

And each of R₁ to R₉ are -L or -L-Y:

Where L represents:

Group 3: Hydrogen or linear or branched alkyl

Group 4: Substituted or unsubstituted aryl

Group 5: Substituted or unsubstituted heterocyclic

Group 6: Substituted or unsubstituted cycloalkyl

Group 7: Sustituted or unsubstituted amino

Art Unit: 1709

Group 8: Substituted or unsubstituted alkyl

Group 9: Halogen

Group 10: Nitro

Or

Where L represents:

Group 11: Substituted or unsubstituted arylene

Group 12: Substituted or unsubstituted divalent heterocyclic

Group 13: Substituted or unsubstituted linear or branched alkylene

Group 14: Substituted or unsubstituted cycloalkylene

And where Y represents:

Group 15: Hydrogen or linear or branched alkyl

Group 16: Substituted or unsubstituted aryl

Group 17: Substituted or unsubstituted heterocyclic

Group 18: Substituted or unsubstituted cycloalkyl

Group 19: Substituted or unsubstituted amino

Group 20: Substituted or unsubstituted alkyl

Group 21: Halogen

Group 22: Nitro

Art Unit: 1709

Applicant is required to elect for *EACH* of X_1 - X_8 from Group 1 or 2.

Applicant is required to elect for *EACH* of R_1 - R_9 from (one of Groups 3-10) or (one from each of Groups 11-14 and 15-22).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1-16.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

3. The common technical feature is the compound of the following general structure

where X_1 - X_9 are defined as above, and R_1 - R_9 are defined as above.

Art Unit: 1709

4. This technical feature is not novel however, in light of Ueda et al. (JP 2001160488), which describes compounds and electroluminescent devices comprising compounds with the following structures, which meet the limitations of the Applicants' generic structure. [0078]-[0079]

Art Unit: 1709

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
